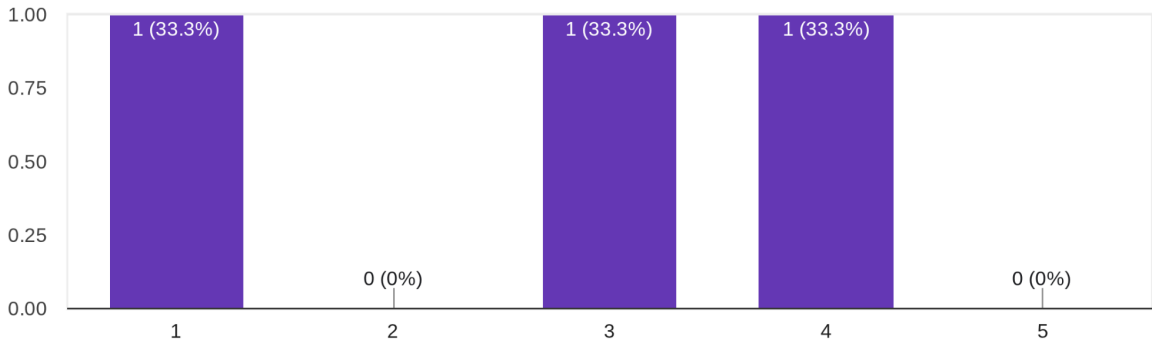
What is the primary purpose of a strong, unique password?

3 responses

On a scale of 1 (Not confident) to 5 (Very confident), how confident are you in identifying fake news or misleading information online?

3 responses



In your own words, briefly explain the concept of 'Two-Factor Authentication' (2FA).

3 responses

Response summary

- **Mechanism and Purpose:** Two-Factor Authentication (2FA) is a security method requiring two steps to log in, typically involving a password (First step) and a temporary code (Second step) generated by an app or sent to a phone/email.
- **Lack of Knowledge:** Some respondents indicated they did not know the concept.
